

# SAREL custom-built solutions

To respond to the needs of panel-builders and industrial sector users, **SAREL** offer custom-built solutions, varying significantly from the standard offering, for small, medium or large ranges enclosures.

Customization at **SAREL** is a permanent and complete process from the creation of the specifications all the way to delivery and measurement of the customer's satisfaction.

## ✓ Accessories

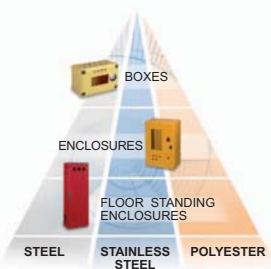

To provide a total solution all our standard accessories can be assembled on your custom-built enclosures.

## ✓ Cut-outs

All types of cut-outs are possible. They are made in the primary stages of production and benefit from the final coating to prevent any risk of corrosion.

## ✓ Finishes

A choice of coatings enable you to customise the enclosure to your colour and application.

We have your solution

# The advantages of SAREL Custom-Built Solutions

## Time-saving

While you take care of the wiring, SAREL makes your cut-outs and assembles your accessories.  
By providing a complete ready to wire product with a single reference SAREL simplifies your ordering and goods receipt procedures.

## Adaptation to the environment

By providing customised dimensions in mild steel, stainless steel and polyester, SAREL offers solutions to match your sizing needs.

## Ergonomic

The functionality of the enclosure depends on its configuration. The trim and accessory offer from SAREL will help save time and simplify use.

## Guarantee

Factory assembly will provide you with a manufacturer's warranty on the conformity of the enclosure to all current applicable regulations.

## Industrial Quality

The cut-outs are made before applying the coatings and provide resistance to corrosion and a high protection index.

## Large range of colours

With a colour palette of 37 colours SAREL provides a choice to match your image.

## Configured and Specific, two custom-built solutions to match your needs

SAREL has created the Configured offer and the Specific solution in order to provide you with most appropriate and timely result.

### The Configured Offer, a standard product enhanced to your needs

Based on the standard offer, we assemble the accessories, make the cut-outs and apply the paint selected from our range offer.

#### The SAREL ADVANTAGE

- Large dimensional range.
- Wide functional range of accessories.
- No need for a feasibility study.
- Short lead-time and guarantees.

#### How can it be done?

Choose the accessories from the catalogue, consult our planning sheet or contact your local SAREL representative.

Save time by making your cut-outs and assemblies based on our DXF schemes, downloaded from our webpage.  
[www.sarelenclosures.com](http://www.sarelenclosures.com)

### The Specific Solution, a product which is customized for you

We create the enclosure in response to your application based on our industrial expertise.

Non-standard dimensions, special colours, custom-made accessories, integration, thermal, customized trims and configuration.

#### The SAREL ADVANTAGE

- Solution to match your needs.
- Feasibility study with help from a dedicated team.
- Quality industrial production.
- Guaranteed lead-times.

#### How can it be done?

Contact your SAREL representative and explain your needs. A professional team is at your service to develop your specific solution.

#### Large range of colours
